

## BEN E. KEITH

Schertz, Texas

When Ben E. Keith Food Distributors needed new signage at their new distribution center outside of San Antonio, they turned to FSG.

### CHALLENGE

Ben E. Keith needed a company that could help them get both exterior signage as well as interior way-finding signage. Additionally, Ben E. Keith wanted to have a custom mural printed and installed in the interior hallways of the building. FSG was able to come in and take care of each of these needs for Ben E. Keith.

### SOLUTION

FSG's Signs team designed, fabricated, and installed each signage component needed for the project. Additionally, FSG Electric worked as the electrical contractor on the job. By taking care of these two very large and complicated components of the project for Ben E. Keith, FSG was able to help the project go smoother and give the customer and more custom final product that they could be proud of.
