Electrical Construction

Contract Type

Electrical Construction

Contract Amount

\$4,700,000

General Contractor

Harvey Builders

Electrical Contractor

FSG Electric

Engineering Firm

Wylie Consulting Engineers

Architect

Gensler

CHALLENGE

FSG understands that getting the project designed correctly, in the beginning, helps ensure that the project gets built the right way in the end. Safety, efficiency, and professionalism are just a few things to expect from us. We bring our safety record, innovative solutions, and well-trained teams to every project. Our experience and knowledge gained over the course of many years have allowed us to learn the best practices and then repeat those practices time and time again.

SOLUTION

This project consisted of a new 156,000 square-foot tree refurb./storage/SCM lab building and site lighting on a 70-acre campus located at the northeast corner of Beltway 8, which includes more than a million square feet of office and workshop space. During this first phase, FMC will consolidate its western region subsea services into a single campus which will more than double the region's existing subsea services capacity. FMC purchased 173 acres at this Generation Park location which will eventually serve as the new headquarters.

TechnipFMC is a leading global provider of technology solutions for the energy industry. They design, manufacture, and service technologically sophisticated systems and products such as subsea production and processing systems, surface wellhead systems, high-pressure fluid control equipment, measurement solutions, and marine loading systems for the oil and gas industry.
