

RICE UNIVERSITY - BROCKMAN HALL FOR PHYSICS

Higher Education

The Brockman Hall for Physics gathers together a faculty of experimental physicists formerly scattered in as many as five separate buildings across the Rice University campus. It is now home to dozens of experimental, theoretical, and applied physicists from Rice's departments of Physics and Astronomy and Electrical and Computer Engineering, and will support research in atomic, molecular and optical physics; biophysics; condensed matter physics; nanoengineering and photonics. The 111,000 square foot research facility required sophisticated systems to isolate laboratories from noise, vibration, and fluctuations in temperature and humidity.

Owner

Rice University

Contract Type

Electrical Construction

Contract Amount

\$4,500,000

General Contractor

Gilbane Building Company

Electrical Contractor

FSG

Architect

Kieran Timberlake
