JOINT BASE MCGUIRE-DIX-LAKEHURST

New Jersey

FSG Upgrades Lighting in Base Store

CHALLENGE

Fort Dix, the common name for the Army Support Activity located at Joint Base McGuire-Dix-Lakehurst, is a United States Army post. FSG won a contract to upgrade the lighting at the main exchange.

SOLUTION

Over 1,000 existing T8 recessed fluorescent light fixtures were upgraded to new recessed LED troffers. Additionally 12 HID high bay fixtures were also converted to LED high bays.

RESULT

The base was impressed with FSG's high installation quality control. Ralph Fox, the electrical designer commented "FSG and their crew have been amazing to work with on this project both in the office and the installation crew. The store looks very good and the installation workmanship is very professional. Their professional installation and overall professionalism during the project is very refreshing. While there was lots of potential for this project to get bogged down with installation issues or lack of coordination with the store, FSG took the lead to ensure that everyone was kept well informed of how things were going and what they needed to succeed."
