

## City of Kyle

Kyle, Texas

### Owner

City of Kyle

### Project Type

Municipal Signage

### Signs Contractor

FSG Signs

### SIGNS CASE STUDY

#### The City of Kyle stands out on I-35 with beautiful Gateway and Directional Signage by FSG Signs.

#### Challenge

The City of Kyle had a gateway and directional signage project in the works for some time, all they needed was a sign company with the skill to execute their ambitious plans. They were referred to FSG Signs, and as a proud member of BuyBoard we were pleased to accept and partner on the project.

Wayfinding and gateway signage presents particular challenges with municipal codes and permitting specifications. As two of the gateway signs would be set off I-35, safety was definitely of critical importance. The FSG team worked closely with the city of Kyle to meet requirements for materials, colors, and design, as well as electrical and lighting needs.

#### Solution

Working from concept drawings provided by the client, the FSG Signs artist designed inviting directional signage to welcome visitors and residents to the beautiful city of Kyle. They are certainly eye-catching and charming, as evidenced by the photo gallery below.

Collaborating with City of Kyle engineers, a total of 4 monument gateway signs and 15 wayfinding signs were fabricated and installed, enhancing the cityscape and making it much easier to navigate and find landmarks and businesses in the area.

We are so pleased with the results!
