EV CHARGING CASE STUDY

FSG Becomes A Certified Installation Partner for Tesla

CHALLENGE

Tesla's Destination Charging networks are continually expanding, offering Tesla drivers unparalleled convenience and comfort. FSG is a Tesla Certified Installation Partner, and services Tesla charging stations across the United States. FSG has also installed hundreds of Tesla Wall Connector charging stations in commercial facilities across the country.

SOLUTION

What makes Tesla unique among other EV vehicle manufacturers, is that they are also building out a charging network for their vehicle owners to utilize. In 2021, Tesla opened their charging network to other vehicles which enable them to gain access to the new 7.5 billion dollars in EV funding in the US.

RESULT

With more than 2,300 dedicated employees and over 1,000 affiliated vendors across the country delivering FSG's quality services and solutions around the clock, FSG was the ideal partner for Tesla, providing installation and maintenance services for charging stations across the Nation and around the corner.
