## LIGHTING CASE STUDY

FSG Delivers Winning Relationship for Noblesville Indiana Schools

### CHALLENGE

Noblesville Schools, a prominent educational institution serving over 10,000 students in Indiana, embarked on a transformative journey to enhance its facilities and operational efficiency. Recognizing the potential of LED lighting to drive significant savings and improve the learning environment, the district collaborated with Stratelign to initiate a comprehensive lighting retrofit project in 2019. Tasked with ensuring meticulous project execution and adherence to stringent specifications, Noblesville Schools turned to FSG, a partner with a proven track record in delivering turnkey solutions.

### SOLUTION

Once the job began, Noblesville Schools' Assistant Superintendent marveled at the way working with FSG involved clear, simple communication with a single point of contact in FSG's Indianapolis office. Hunter Kasten was able to answer every question because all aspects of the Noblesville Schools project were right at his fingertips. For facility administrators used to endless email chains and voicemail loops, it was remarkable to be able to pick up the phone and within minutes hang up again with answers.

### RESULT

As the partnership between Noblesville Schools and FSG flourished, so too did the scope of their collaboration. Beyond the initial lighting retrofit, FSG emerged as a trusted advisor, offering insights and solutions to address the district's evolving needs. Amid the challenges posed by the COVID-19 pandemic, FSG stepped up to provide innovative disinfection solutions, equipping each school with portable UV carts and offering guidance on safety protocols. Looking ahead, discussions are underway to further enhance facility infrastructure, with FSG at the forefront of initiatives to upgrade stadium lighting and implement advanced disinfection technologies. Through their ongoing partnership, Noblesville Schools and FSG are illuminating the path to a brighter, safer future for students, faculty, and staff alike.
