Help Your Dealership Get in Charge

Your dealership and your vehicle lineup is moving into the next generation. Now, it's time to electrify your operation with the ultimate **Energy Management Solutions**.

Wallbox is a global leader in electric vehicle supply equipment (EVSE), headquartered in Barcelona, Spain. We offer American Made products, manufactured in Arlington, Texas, and optional dealership installation by Facility Solutions Group, with customer home installation by COIL, a Wallbox Company.

We are dedicated to changing the way North America uses energy in the electric vehicle industry. Wallbox creates smart charging systems that combine innovative technology with outstanding design. Our chargers manage the communication between vehicle, grid, your dealership, and chargers.

Level 2 Your Customer's Home

Powerful, Compact, & Connected: Help your customers charge smarter with faster charging at home, optimized for all EVs.

Power Sharing: **Connect Multiple EVs** with built in load balancing, distributing power across multiple chargers, even on the same circuit.
