Construction

Contract Amount

\$1,402,000.00

General Contractor

Manhattan

CHALLENGE

In response to the Chickasaw Nation's need for a secure and resilient data center to support its diverse business operations, including the WinStar Casino in Thackerville, Oklahoma, Manhattan Construction engaged Facility Solutions Group (FSG) to provide specialized electrical construction expertise. The \$1,402,000.00 construction project aimed to create a cutting-edge facility capable of withstanding extreme weather conditions, such as 200 mph winds associated with EF-4 tornadoes.

SOLUTION

The primary challenge for the construction project was to design and build a data center that not only incorporated state-of-the-art technology but also met stringent requirements for structural integrity and resilience. FSG rose to the occasion by executing its electrical construction work with precision and efficiency, ensuring that the data center was equipped to handle the demands of the Chickasaw Nation's critical business functions. By collaborating closely with Manhattan Construction, FSG successfully delivered electrical systems that met the project's tight specifications and timeline.

RESULT

FSG's contribution to the construction of the WinStar Casino Data Center underscores its commitment to delivering high-quality electrical solutions for mission-critical facilities. The completion of the project not only provides the Chickasaw Nation with a robust and secure data center but also reinforces FSG's reputation as a trusted partner for complex construction endeavors. Through its expertise and dedication to customer satisfaction, FSG continues to play a vital role in supporting the infrastructure needs of organizations like the Chickasaw Nation.
